

# UV-C Ionizer

- Ultra Violet sterilizer and Ionizer in 1.
- 75 Watt UV-C for swimming pools up to 75, 000 L

**By using Blue Lagoon you can have a chlorine free pool which can be a back-up water supply in the event of our dams running dry.**

This revolutionary combination of UV-C sterilization and copper Ionization means you can have a chlorine/chemical free pool.

## **Advantages of a Blue Lagoon UV-C Ionizer:**

- Eco friendly water sterilization
- Crisp, clean and clear pool water
- The pool's backwash water can be used on your garden
- Protects your pool from germs, mould, bacteria and algae
- Low dosage Copper keeps algae under control when the pump is not running
- No more chlorine, no more salt
- No more red eyes not skin irritation
- Low power consumption of only 75W
- Complete with unions. Fits 63mm and 50mm glued and 40mm threaded pipe work
- Test strips for copper, alkalinity and pH are provided
- Made in the Netherlands

The Blue Lagoon UV-C Ionizer only doses between 0.4 to 0.7 ppm! This amount of copper dosed in the water is within the South African DWS drinking water quality guidelines (0 - 1 ppm) and will not stain the pool.

Ultra Violet sterilizer and copper Ionizer in 1, a single unit is suitable for pools up to 75,000 L. The system can be placed parallel to accommodate bigger pools.

## Other UV products:

**UV-C Tech**  
Reduce chlorine by 80%

**Ozone UV-C**  
Ozone breaks down natural fat (including sun tan lotions) that forms oily skin on the water

**Immersion UV C**  
Keep the water in your tank sterile

**Pro Buster**  
For commercial pools

**UV-C Pro 8L**  
For use in agriculture/horticulture or domestic drinking water
